Training & Education

Codetalk, St. Joseph Center

- 16-week intensive
Front-End Developer
Bootcamp.
- Developed multiple
projects ranging from
pixel-perfect PSD to
HTML pages to
multi-page fully
responsive Bootstrap
sites containing jQuery.
- Utilized both *WordPress*
CMS and local MySQL
database on Apache
server.
- Designed interfaces with
Sketch and *Pixelmator*.

Bachelor of Arts 2012
Psychology & Sociology
University of Nevada, Reno

Projects

Space Bubby
spacebubby.com

Lead Developer

Lead Developer on a six person team that used HTML, CSS, and jQuery to bring the vision of the client and UI designer to life. Used the *WordPress* CMS and *underscores* starter theme as the basis. The site included many new elements, including modals and full-screen video backgrounds. Researched, implemented, and coded these new features.

Santa Monica Travel
samotravel.com

Project Manager

As Project Manager on samotravel.com, utilized Agile techniques to lead a team consisting of five other classmates. Liaised between the client and team explaining the specifications of the project and ensuring that the output met the client's expectations. When necessary made quick decisions to sustain our momentum.
